DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/21/2003 has been entered.

Response to Arguments

2. Applicant's arguments and amendments, filed 2/21/2003, have been fully considered and reviewed by the examiner. Claims 1-14 are pending.

The applicant has argued that the Hayashi reference does not teach the newly recited limitation of directly introducing the atomized solution into the film forming chamber. The examiner disagrees. Hayashi teaches introducing the atomized solution directly into the film-forming chamber with the nozzle opening (Col. 9, lines 59-65; Fig. 1A). The atomization and nozzle delivery of the precursor delivery taught by Hayashi reads on that claimed in step (b) of Claim 1. The applicant argues that the presently claimed invention avoids the need for piping or similar apparatus to deliver the atomized solution to the film forming chamber. However, it appears that the applicant's arguments are not commensurate in scope with the claims, and thus are not convincing. The remainder of the applicant's arguments have been addressed by the

examiner in the Advisory Action No. 8, mailed 1/28/2003. The examiner is maintaining his position on these matters.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 9, and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. in view of Solayappan et al.

Hayashi et al. and Solayappan et al. are applied here for the same reasons as given above and in paragraph 3 of the previous office action, No. 6, mailed 10/22/2002.

5. Claims 4-8 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. and Solayappan et al. as applied to claim 1 above, and further in view of Ogi et al.

Hayashi et al., Solayappan et al., and Ogi et al. are applied here for the same reasons as given above and in paragraph 4 of the previous office action, No. 6, mailed 10/22/2002.

Conclusion

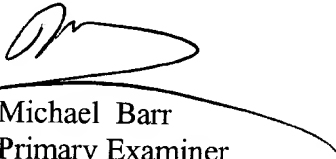

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Liu et al. teaches atomizing a liquid in a nozzle and then directly delivering the atomized liquid to a chamber.
